Form of study: **full-time**

Length of study: **6 years**

Tuition fee: **420 000 CZK**

Study plan: [Study plan](#)

Study programme General Medicine

The Third Faculty of Medicine started teaching this study programme in English for foreign applicants in the academic year 1991/92. The study is parallel to the education in Czech language. Graduates from the Faculty achieve a complete medical education with extended knowledge in the area of preventive health care. After a successful completion of their studies, they are awarded the degree **M.D. (Doctor of Medicine, MD)**.

They may practice in all medical disciplines. Foreign students are required to be able to use the Czech language by the end of the 2nd year of studies so that they can communicate with patients and hospital staff during their clinical training.

The Third Faculty of Medicine is accredited by the U.S. Department of Education for the study of U.S. students.

Why Choose Third Faculty of Medicine?

Students choose our faculty primarily for its unique complex methodology of study and practice from the first year. The clinical base of the 3rd Faculty of Medicine consists mainly of the [University Hospital of Královské Vinohrady in Prague 10](#).

Our curriculum of medicine has undergone a radical reform as the only one at medical schools in Central and Eastern Europe, drawing on comparable experience from a number of Western European and North American medical schools. The Third Faculty implemented the curriculum based on principles of integrated.

The medical studies are divided into three basic cycles:

Cycle 1 (1st and 2nd year) – Basic Biomedical Sciences – integrates theoretical subjects into the following modules: Structures and Function of Human Body; Cell Biology and Genetics; Biophysics and Informatics; Methodology; Needs of Patients. Besides, there are several free-standing courses (e.g. Medical Terminology - Latin).

Cycle 2 (3rd and 4th year) - Principles of Clinical Medicine - consists of these modules: Theoretical Foundations of Clinical Medicine, Clinical Propedeutics, Basic Clinical Problems, and Compulsory Optional courses.

Cycle 3 – (5th and 6th year) Clinical Preparation – consists of these modules – Internal Medicine; Surgery; Gynaecology and Obstetrics; Paediatrics and Preventive Medicine.

Students also use **Logbook**, which was conceived by the common European initiative EUROSILLS, which our Faculty also took part in. The logbook thus ensures compatibility of the studies at our Faculty with those in other European countries.

History of our faculty

Charles University was founded in 1348 during the rule of King of Bohemia and Holy Roman Emperor Charles IV. Our Faculty refers to the tradition of medical studies at Charles University as it formed one of the four basic subjects upon its foundation.

The teaching basis of the 3FM CU includes the University Hospital Královské Vinohrady, Psychiatric Centre Praha, Hospital Na Bulovce, Thomayer Hospital, Institute for Mother and Child Care, Hospital Na Homolce, Central Military Hospital and The National Institute of Public Health. Prominent experts of the Czech Academy of Sciences and Institute of Clinical and Experimental Medicine also participate in the teaching.
