
Dr. Marie Bourne

Assistant of the Division of General Practice

My name is Dr Marie Bourne, I'm a GP from Prague. I studied medicine and undertook my GP training in the UK. I then went onto read for a Master's degree at Leiden University, in Holland. I returned to Czechia in 2020. Since that time I have been an active member of the Division of General Practice, where I facilitate communication training. Since 2022 I am also a member of a teaching team teaching a student selected course "Health impacts of climate and ecological crises on health". I have undertaken a 2 year programme titled "palliative care GP's". I like to cycle in my free time.
