Entrance exam – General Information

In order to sit the entrance exam you will need:

- computer with a functioning Google Chrome browser (the online tools should work well in all main web browsers but Google Chrome is probably the best one)
- functioning web camera and a microphone
- good network connection
- your passport or other ID card

You can also print out periodic table of elements with the atomic weight of elements.

Before the exam

Access the main link: http://prijimacky.inis.lf3.cuni.cz/info/, which will lead you to the testing platform, teleconference, your results and further information.

You will find there the access to the testing platform. Once you log in you will see a “course” named “Entrance exam, date”. Please click on the one with appropriate date to enter the testing environment.

Clicking on the “Click here to start the test” will open the test for you so that you can complete it.

You will find a section with important general information about the entrance exam and practice test - we urge you to complete it well before the exam takes place.

- There are only four questions in the Practice Test, each on a separate page. Choose the option you think is correct and continue to the next one. If you want to go back to a previous question, click on the “Previous page” below the question. Once you’ve answered the last question the test will give you the option to return to the attempt and change your answers or submit the test. By submitting the test you complete it and can finish. The test will submit itself and close automatically 1 hour after you start it (the real entrance exam test will do the same after 3 hours), you can see the timer on the right side of the test. You can play around with the Practice test as you like to learn how to work in the testing environment.

- Completing the practice tests tells us you have no technical problems with the testing platform and can proceed to the entrance exam test. Do not worry, your answers to the practice test will have no effect on your entrance exam scores, however, not completing it may complicate the ensuing procedures.

We ask you to do a practice log into the teleconference few days prior the exam, where we can test your connection. You will log into the teleconference via the main link on the date and time specified in your invitation and we will communicate with you giving you further details about the entrance exam and providing space to ask questions. If you have serious reasons not to log in on the date of the practice teleconference you must email us beforehand to arrange an alternative date and time.
The Exam

On the day of your entrance exam you will need to log into the testing platform (please do it approximately 10 minutes before the exam starts to avoid problems) and also connect to the teleconference using the main link. The teleconference software will ask you for your name, please enter your name and surname. When prompted, you must allow the teleconference software to use your camera and microphone. This teleconference link will allow us to communicate with you during the exam and also monitor your behaviour to prevent cheating.

The entrance exam is in two rounds:

- First is a written (electronic) test in Biology, Chemistry and Physics or Mathematics.

In the online test always exactly one option is correct and there are no negative points for an incorrect answer. You will have in total 3 hours to complete the test. You may go back to your previous answers and correct them until the end of the testing time. You may not use calculators or any other devices or books (including your notes) and of course, you are not allowed to ask anyone for assistance. We will observe you the whole time of the exam through a teleconference using your computer’s camera and microphone. Any attempt at cheating will result in failing your entrance exam and the inability to enrol in the medical programme of the Third Faculty of Medicine.

One hour after the test you will see at the main link, if you have passed the written test and continue to the interview and when exactly it will be. The interview will take place on the same day as the written part of the exam.

- The interview will be done via the teleconference. It includes an interpretation of a popular scientific text, general overview and communication skills

After the exam

You will find your results at the main link approximately one week after the entrance exam. The official decision on admission will be sent to you after the submission of your high-school leaving certificate.

We very much hope that even in these complicated times you will successfully pass the entrance exam and come in September to start fulfilling your dream of becoming a doctor at the Third Faculty of Medicine in Prague.

We hope your experience with these online tools will be a smooth one.

If you have any questions, please do not hesitate to contact us at entranceexams@lf3.cuni.cz or call one of these phone numbers:
