Department of Plastic Surgery 3FM CU and UHKV is the oldest and largest plastic surgery department in the Czech Republic. The clinic was founded by Prof. Burian, one of the founders of the field of plastic surgery in Europe, in the first half of the last century. Since its foundation, the clinic has maintained a leading position among plastic surgery departments in our country. The clinic provides a spectrum of operations in the entire range of the field of plastic surgery - from the treatment of congenital developmental defects, acute injuries of the hand and face, complex microsurgical reconstructions to aesthetic surgery procedures. We perform more than 8,000 surgical procedures annually.

It is the only training facility for other plastic surgeons with the highest level of accreditation for the Czech Republic. Patients are cared for with the utmost care and pleasure by the largest team of plastic surgeons and nurses in the Czech Republic.
