
Databases and collections at Third Faculty of Medicine

The most used databases

Amboss

[Amboss](#) - factual portal of study materials in the field of medicine ([more information](#))

UpToDate

[UpToDate](#) – a database that contains information about:

- drug interactions
- patient management (how to communicate diagnoses to different types of patients, how to discuss treatment plans with patients, etc.) - calculators and calculations

Atlases - PATHOLOGY IMAGES

[Atlases - PATHOLOGY IMAGES](#) is a freely available collection of histological images. To access high-resolution images, you must log in.

Evidence-Based Medicine Reviews (EBMR)

[Evidence-Based Medicine Reviews \(EBMR\)](#) – a set of databases that provide a comprehensive basis for research and decision-making for evidence-based medicine (*a systematic approach to treatment that integrates the best available scientific evidence with the clinical experience of the physician and with the preferences and needs of the patient being treated*). It collects and synthesizes research from a variety of sources, including systematic reviews and clinical trials, so that the results help physicians and researchers stay up to date on the latest approaches in their fields

E-books, textbooks, atlases

Bookport

[Bookport](#) - database of Czech and English professional and popular-educational e-books. Collections "Healthcare" and "Nursing". Contains books from the publishing houses Grada, Galén, Karolinum, MedMuni.

Thieme MedOne Education

[Thieme MedOne Education](#) - anatomical atlases and e-books in English.

Harrison's Principles of Internal Medicine, 22nd Edition

[Harrison's Principles of Internal Medicine, 22nd Edition](#) - American Textbook of Internal Medicine. This publication provides comprehensive, accurate, and essential coverage of the pathogenesis, diagnosis, and treatment of disease.

Medical literature – publishing houses and publishers

Karger

[Karger Publishing House](#)

- a collection of online guides for doctors, nurses and medical students. Each guide contains evidence, essentials of diagnostics, treatment and patient care in a concise and clear form [Karger Fast Facts](#) .
- a collection of e-journals in the field of medicine -

[Karger Journals Online Current](#)

Lippincott, Williams & Wilkins

[Lippincott, Williams & Wilkins](#) Publishing House - full-text collection of medical journals focused on medicine and healthcare - [Lippincott, Williams & Wilkins High Impact Collection](#) .

Taylor & Francis Group

[Taylor & Francis Group](#) Publishing House - full-text collection of e-journals of the publishing house - [Taylor & Francis Online Medical Library](#) .

Multidisciplinary publishing houses and publishers that also publish medical literature

Elsevier

Elsevier - database of e-books, manuals and journals [ScienceDirect](#) . Provides access to full texts of journals and books in the field of scientific, medical and technical literature.

Springer

Springer Publishing - database of e-books, manuals and journals – [SpringerLink](#) . Provides access to full texts of journals and books in the fields of science, technology and medicine.

Oxford University Press

Oxford University Press - complete collection of peer-reviewed scientific journals [Oxford Academic](#)

John Wiley & Son

Publisher John Wiley & Sons - an extensive full-text database containing titles of electronic journals, books and reference guides in the fields of medical, natural, social and human sciences and arts [Wiley Online Library](#) .

BioMed Central (BMC)

BioMed Central (BMC) - makes available full texts of open access articles from peer-reviewed journals in the fields of biology, clinical medicine and healthcare.

Academic Search Ultimate

Academic Search Ultimate

- a full-text database providing access to journals, reports, notes, books and videos in many languages from Europe, Asia, Oceania and Latin America.

Cambridge Journals

Cambridge Journals - a collection of e-journals and a selection of e-books from the fields of social, humanities, law, natural, medical and technical sciences.

Databases of records of articles and other publications in the field of medicine

PubMed®

PubMed® is a free, searchable bibliographic database (a database of records about a book, article, etc., containing information such as author, title, year of publication, abstract, and more) of the National Library of Medicine® (NLM) of the United States that supports scientific and medical research. It contains more than 38 million bibliographic citations and abstracts of articles from the biomedical and biological literature.

MEDLINE

A subset of PubMed is MEDLINE (Medical Literature Analysis and Retrieval System Online), the largest database of bibliographic records in public health, clinical care, nursing, dentistry, preclinical sciences, and other medical fields. It contains records of articles from 5,200 professional journals in 40 languages. Both databases include click-throughs for full texts for some articles.

Bibliographic records databases – multidisciplinary

Web of Science

Web of Science (WoS) is an international bibliographic and citation database covering thousands of scientific journals, a large collection of books and conference proceedings across disciplines. Information about publications is available including abstracts and cited references. It allows searching and tracking of scientific articles in terms of citations, cited sources, authors or journal impact factor.

Journal Citation Reports

Journal Citation Reports (JCR) provides a qualitative assessment of scientific journals based on citation responses. It is a source for obtaining bibliometric indicators such as Impact Factor, Immediacy Index, Cited Half-life and many other information.
