Change in Amboss Login – Licenses for 2026

A change in Amboss login applies for 2026, it will no longer be necessary to request a license code via the faculty application. The new method of distributing licenses, or verifying authorized users (via CAS), is available at <https://www.amboss.com/int/cz/campus-licenses>. Please select your faculty and follow the instructions.

According to information from RUK and Amboss, the new login and obtaining a license code for 2026 should already be launched. There is no time or year limit on registering for licenses. The number of licenses should cover all interested parties – both students and teachers.

Amboss should send an information email to all already registered users about the change in login and obtaining licenses.

We can only resolve any problems with logging in after the new year, after returning from vacation.

Thank you for your understanding
