

International Summer School on Imaging for Medical Applications

02 - 06 July 2018

Sibiu, Transylvania, Romania

SSIMA 2018 will be focused on **Artificial Intelligence in Medicine** and will take place between the **2nd and the 6th of July, 2018**, in **Sibiu, Transylvania**.

Besides key lectures, this year, SSIMA will host 2 separate series of practical experiences for our participants, in the form of hands-on workshops:

- Philips Innovation Day will offer a series of applications of AI in healthcare developed by Philips
- Workshop on TensorFlow (developed by Google) with applications on medical images, organized by Computer Vision and Robotics Group, led by Marius Leordeanu
